

Powerpoint presentations

Presentations should cover three topics:

1. highlights of your cardboard box design (why good, neat options, uniqueness)
2. The process your team went through to come up with the design (did you meet, how did you decide what to do, what fell apart, did your ideas change, etc.)
3. What have you learned about homelessness in general and in the LC valley and what does engineering have to do with this.

Here are some websites for powerpoint inspiration
