Core Theme 1. Opportunity			MET	Not-MET

¹ Although this indicator technically missed the annual benchmark of ‘1% increase or maintain’, the size of its annual decline was less than one standard deviation of the mean of the measurement, and thereby considered to have maintained.

² Performing below the annual benchmark contributes to mission fulfillment in the case of the tuition, whereby lower tuition at LCSC compared to its Idaho peers is a positive outcome. Percentage measures the relative distance between LCSC tuition and the average tuition of the three other Idaho public 4-year institutions.

³ In cases where more than one measurement is used to satisfy the indicator, percentage measures the *average* relative distance between multiple measures and their respective annual benchmarks.

⁴ Although this indicator technically missed the annual benchmark of ‘1% increase or maintain’, its annual decline was less than one standard deviation of the mean of the measurement, and thereby considered to have maintained.

⁵ First-time, full-time retention reported to State Board of Education on the LCSC’s Strategic Plan that considers whether students graduate as well as re-enroll.

⁶ Percentage represents the distance between the outcome(s) to the long-term benchmark(s) (there was not an annual benchmark).
