

Paid Internships Hours

Fully paid internships are fairly rare in Social Work Education. However, this diagram may help you in navigating when certain hours within your employment and internship overlap in such a way that they fulfill two requirements: the activities that fulfill your employment responsibilities and your internship learning objectives simultaneously and thus *may* have the opportunity of being paid. You are only eligible for paid internship hours if your place of employment and internship are at the same agency. Prior to receiving paid internship hours contact your Field Liaison for an Application to Paid Internship Hours.
