## Midterm Mindfulness

As midterm grades approach, here are a few tips for a tidy Gradebook:

- [Place assignments in meaningful groups on the Assignments page](#)
  - Assignment groups control how averages are calculated and displayed in the Grades area, allow you to [drop low scores from a set of scores](#), and allow you to [weight grades](#)
  - Delete any empty assignment groups
- Assign zeros to missing work
  - Canvas calculates grades as a running total; assign zeros to missing work to ensure students see an accurate representation of their grade to date
- Hide unpublished assignments from your Gradebook view
  - Access Grades, click the "View" menu, and click "Unpublished Assignments" to show/hide unpublished assignment columns
- Locate your Total column, click the "more options" dots, and select "Move to Front" to place the total column right next to the student names
